## PREFACE

This is the fifty-first issue of the Publication "Estimates of Area and Production of Principal Crops in India". It contains statistics of area, production and yield per acre of principal crops along with the rainfall data. It gives all India figures for the decennium ending 1956-57 and State-wise data according to the new set-up of States after their re-organisation on November, 1, 1956 for the quinquennium ending 1956-57.

The detailed work involved in the preparation of this Volume has been done in the Agricultural Intelligence (Estimates) Branch of the Directorate of Economics & Statistics.

S.R. Sen  
Economic and Statistical Advisor  
to the Government of India  
Ministry of Food and Agriculture.

New Delhi,  
July, 1958.

## NOTES AND ABBREVIATIONS

### NOTES:

The figures of area and production for 1954-55 and 1955-56 as given in 'Agricultural Statistics of Reorganized States' and in the various All India Final Crop Estimates for 1955-56 related to 'Partly Revised' and 'Final' Estimates. These figures have been revised in this publication on the basis of final revised figures that have now become available from the State Governments. Data for 1956-57, however, relate to 'Final' estimates and are, therefore, subject to revision. A statement giving "Partially Revised" Estimates for 1956-57 and 'Final' Estimates for 1957-58 in respect of crops for which All India Final Estimates for 1957-58 have so far been released is given in Appendix I.

2. The method of estimation of area has changed during the past few years in certain States. In Bihar, the State Government have switched over from the chowkidari system of reporting the acreage to that of complete enumeration. In West Bengal, the State Government have changed over from the traditional method of reporting to random sample surveys. The table below indicates the crops along with the years from which the method of estimation has changed in these States.

State	Crops	Year from which the method of estimation has changed.
Bihar	Rice, Maize, Wheat, Barley, Gram, Sugarcane, Jute and Tobacco.	1948-49
	Jowar, Bajra, Ragi, Sesamum, Rape and Mustard, Linseed and Castorseed.	1949-50
West Bengal *	Rice .. ..	1947-48
	Gram .. ..	1948-49
	Wheat, Barley, Linseed, Rape and Mustard and Jute.	1949-50
	Sugarcane .. ..	1950-51
	Jute .. ..	1951-52

\* In the case of jute, the acreage was based on random sample surveys in 1949-50 and on eye-estimates in 1950-51. Since 1951-52, it has been based on random sample surveys except in Darjeeling districts.

3. As a result of investigations carried out over a number of years, the supremacy of the objective technique of Random Sample Crop Cutting Experiments over the traditional method of estimating the production of crops has been established and gradually the States have been carrying out such surveys on more and more crops. The table below gives the crops, along with the years, for which production estimates are based on random sample crop cutting experiments in each State:

State	Region	Crops	Year from which the method of crop-cutting surveys has been adopted
1	2	3	4
Andhra Pradesh	Telengana Region	Wheat,	1951-52
		Rice, Jowar, Bajra and	1952-53
		Maize	1955-56
	Andhra Region	Rice	1953-54
		Jowar, Bajra, Ragi and Sugar- cane.	1954-55
Assam &	-	Rice	1951-52
		Jute and Potato	1952-53
Bihar	-	Rice and Wheat	1948-49
		Barley and Gram	1949-50
Bombay	Former Bombay State portion	Rice, Jowar, Bajra and Wheat.	1949-50
		Maize (Gujarat Districts only), Ragi (Ratnagiri & Dangs Districts only), Cotton, Groundnut, Tobacco and Gram	1951-52
	Vidarbha Region	Rice, Jowar, Wheat, Gram,	1951-52
		Kodonkutki and Tur Cotton	1954-55
	Marathwada Region	Wheat	1951-52
		Rice, Jowar, Bajra and Maize	1952-53
Madhya Pradesh	Malakoshal Region	Rice, Jowar, Wheat, Gram	
		Kodonkutki & Tur	1951-52
		Cotton	1954-55
	Vindhya Pradesh Region	Rice, Jowar, Maize, Wheat, Barley & Gram	1952-53
	Bhopal Region	Rice, Jowar and Wheat	1951-52
		Gram	1952-53
Madras		Rice, Jowar, Bajra and Ragi	1955-56
Punjab	Including Pepsu	Wheat and Gram	1951-52
		Bajra and Maize	1952-53
	Former Punjab State	Rice and Barley	1951-52
		Jowar	1952-53
Uttar Pradesh		Wheat, barley and Gram	1949-50
		Rice, Jowar, Bajra and Maize	1950-51
		Tur	1951-52
		Jute	1955-56
West Bengal &&	Excluding Dar- jeeling district and territories. transferred from Bihar.	Rice	1947-58
		Wheat, Barley, Gram, Rape & Mustard, Linseed and Jute.	1949-50
		Sugarcane	1950-51
		Jute and Potato (winter)	1951-52
		Tur	1952-53
		(iii)	

P 21/12/52  
11.4.60

(1)	(2)	(3)	(4)
Mysore	Old State Coorg- region	Rice, Jowar, Bajra & Ragi Rice	1951-52 1952-53
Rajasthan	Old State (i.e. excluding Ajmer)	(Wheat, Barley and Gram (Jowar, Bajra and Maize (Cotton	1951-52 1952-53 1953-54
	Ajmer	(Wheat (Jowar, Maize and Barley	1952-53 1953-54
Delhi		Wheat	1952-53
Himachal Pradesh		Rice and Wheat	1953-54

✓ - Discontinued since reorganisation.

✗ - Experiments were not conducted during 1956-57.

£ - Plains only.

££ - In the case of Jute, production was based on random sample surveys in 1949-50 and on eye estimates 1950-51. Since 1951-52, it has been based on random Sample Surveys except in the case of Darjeeling district.

4. The variation in coverage and changes in method have introduced an element of non-comparability over a large number of years. Thus, the absolute figures of area and production published from year to year are not strictly comparable due to changes in coverage and method of estimation. The variations in coverage since 1949-50 have, however, been small and therefore do not affect much the comparability of acreage data from that year. The improvements in the method of estimation of rates of yield and total production were introduced mainly after 1949-50 especially in the case of food grains and have thus introduced an element of non-comparability in these estimates considered over a period of time. While these developments have improved the quality of the absolute figures of production released from year to year, the absolute figures are not strictly comparable. A series of index numbers of agricultural production has, however, been constructed and this series seeks to link up the production of each year with that of 1949-50 through pairs of comparable figures for each two successive years which are available under our system of crop estimation. These indices of agricultural production as published from year to year in the monthly journal 'Agricultural Situation in India' indicate correctly the real trend in the production of any agricultural commodity. Since the absolute figures of production given in this issue are based on the best estimates that the States could frame from year to year, it is not possible to make any changes in them. In any study of the trends of agricultural production, the correct procedure would be to compare the figures given in a particular crop estimate for the current and the previous year and to use the index numbers for making comparisons over any longer period.

5. The crops given in this publication are broadly divided into three groups viz. Forecast crops, non-forecast crops and plantation crops.

**Forecast crops:** Wheat, rice, Jowar, Bajra, Maize, Ragi, Small Milling, Whorls, Sesamum, and other pulses, Potato, Sugarcane, Ginger, Turmeric, Castor, Groundnut, Castorseed, Sesameum, Rape and Mustard, Linseed, Cotton, Jute and Mesta. Regular all-India estimates are issued for these. The figures in respect of cereals and pulses are for 'reporting' areas only, while those for other crops refer to 'reporting' areas only. Figures for 'non-reporting' areas for other crops are not available. Estimates of area and production of food grains for the 'non-reporting' areas for 1947-48 are based on the averages for the seven years for ending 1942-43, allowance having been made from year to year for the transference of a 'non-reporting' area to the 'reporting' basis. The estimates of these crops for 1948-49 to 1956-57 are based either on special returns received from the State Governments or information available in the Season and Crop Reports and the returns of Agricultural Statistics. The figures for the 'non-reporting' areas for the two periods - (i) upto 1947-48 and (ii) 1948-49 to 1956-57 are thus not strictly comparable in coverage or method of estimation. The figures for the "reporting" areas upto 1956-57 are revised estimates, while those for 1956-57 are final estimates. The figures for 1956-57 are, therefore, subject to revision. The figures for the years 1949-50 to 1956-57 are not strictly comparable with those for earlier years in the case of States where there has been either an extension in coverage or changes in the method of estimation.

**Non-forecast crops:** These cover Bananas (including plantations) Papaya, Sweet-potatoes, Tapioca, Turmeric, Sunn-hemp, Indigo, Lac and Opium. Estimates of area and production of these crops are ad hoc as distinct from the regular estimates of forecast crops, and therefore, do not have the same degree of accuracy as the forecast crops. They are necessarily tentative and their reliability cannot be vouchsafed.

Plantation crops: Plantation crops include Tea, Coffee, Rubber, and Coconuts. Estimates of area and production of Tea, Coffee, and Rubber are based on special returns received from the State Governments in connection with all-India publications on these crops. Data for these crops are provisional as they have generally been estimated in the absence of revised data for certain States according to reorganized set-up. The estimates for Coconuts are similar to those of non-forecast crops.

6. (a) Data for Azam exclude N.S.F.A.  
 (b) Data for Jammu & Kashmir exclude the Pakistan-held portion of the State.  
 (c) Data in respect of foodgrains for Madhya Pradesh are inclusive of estimates for crop grown in forest areas also.
7. Figures of Tea and Rubber relate to calendar years i.e. figures for 1947-48 relate to 1947 and so on.
8. Data for 1956-57 in respect of Coffee have not yet become available.
9. Average yields per acre given in this publication have been obtained by dividing the total production by the corresponding total acreage under each crop. In case of Tea and Coffee, they relate to 'plucked' area and in the case of Rubber to 'tapped' area.
10. Data in respect of opium are as furnished by the Indian Central Lic. Comm. Committee and those of opium by the Narcotics Commissioner, Sindh.
11. Production of Sunn-hemp is estimated in terms of dry fibre.
12. Figures for sesamum, rapeseed and mustard and linseed in the case of J.P. are inclusive of estimates for areas sown under 'Mixed crops'.
13. Production of sugarcane is expressed both in terms of cane and raw sugar (pur or jaggery).
14. Production of groundnut is given in terms of 'nuts in shell'.
15. Production of cotton is given in terms of 'Lint Cotton' and in bales of 500 lbs. each.
16. Production data of cottonseed are provisioned as they have been worked out on the basis of approximate lint to seed ratio.
17. Production of jute and mesta is given in terms of fibre and in bales of 500 lbs. each.

ABBREVIATIONS:

- (a) - Less than 500 acres.
- (b) - Less than 500 tons (unless otherwise stated)
